GitHub: github.com/cejaythakkar
DockerHub: hub.docker.com/u/cejaythakkar07

PROFESSIONAL SUMMARY

Accomplished **Senior Fullstack Engineer & Solution Architect** with **12+ years of enterprise software engineering experience** spanning fullstack development, microservices architecture, platform engineering, application security, and technical customer success. Expert in building high-throughput, mission-critical applications across Manufacturing Execution Systems (MES), enterprise workflow platforms, SaaS products, and marketing automation. Proficient in leading end-to-end SDLC, migrating legacy databases, containerizing applications, remediating security vulnerabilities (VAPT/Snyk), and mentoring engineering teams.

TECHNICAL EXPERTISE

Frontend Technologies:	React.js, Next.js, Redux, Redux Saga, React Context, Angular (4/JS), HTML5, CSS3, SCSS, Tailwind CSS, Stylus, Pug/Jade, Handlebars, jQuery, Storybook
Backend & APIs:	Node.js, Express.js, Python, FastAPI, RESTful APIs, WebSockets, Microservices Architecture, Monorepo Architecture, Swagger / OpenAPI
Databases & Storage:	MongoDB, PostgreSQL, MySQL, Redis, Database Migration (MongoDB to Relational/SQL), Data Integrity & Schema Design
Cloud, DevOps & Security:	Docker, Docker Compose, Kubernetes, AWS, Nginx, Shell Scripting, Linux Admin, Vercel, Render, CI/CD (GitHub Actions), VAPT & Snyk Vulnerability Remediation
Tools & Practices:	Git, VS Code, Postman, Jest, Enzyme, Agile/Scrum, Architectural Design, Technical Mentoring, Production Support & Customer Success

PROFESSIONAL EXPERIENCE

Senior Fullstack Engineer | iBaset Pvt. Ltd.

May 2021 – Present | Ahmedabad, India

> **Key Stack:** React.js, Node.js, Redux, Redux Saga, MongoDB, SQL, Docker, Kubernetes, Helm, Linux, Shell Scripting, CI/CD, Nginx, Swagger/OpenAPI, Monorepo

1. Solumina i-Series (Enterprise Manufacturing Execution System - MES)

Global enterprise MES application enabling tier-1 manufacturers to streamline production and quality control.

- **Frontend Component Architecture:** Architected enterprise-grade frontend modules using React.js and built a central shared component library, accelerating cross-team feature delivery and standardizing UI/UX.
- **State Management & Monorepo:** Integrated complex state management using Redux, Redux Saga, React Context, and Hooks within a high-scale monorepo architecture.
- **Performance Optimization:** Spearheaded frontend refactoring and rendering optimizations, significantly improving core web vital performance and component reusability.

2. Enterprise DevOps, Infrastructure Automation & Data Migration

Standardized containerization, deployment pipelines, infrastructure automation, and zero-downtime database migrations.

- **Containerization & Orchestration:** Standardized multi-stage Docker builds and Docker Compose configurations across microservices, enabling lightweight development environments and seamless deployment onto Kubernetes clusters.
- **CI/CD Pipelines & Shell Automation:** Authored custom Shell deployment scripts and automated CI/CD workflows to streamline multi-environment build, test, and release cycles on Linux servers.
- **Database Migration Engine:** Engineered high-integrity migration automated scripts to seamlessly transition live customer data from legacy NoSQL (MongoDB) to relational SQL databases with zero operational downtime and full data auditability.
- **Reverse Proxy & Security Hardening:** Configured Nginx reverse proxies, load balancing, and SSL termination. Conducted Snyk scans and VAPT vulnerability remediation to reinforce system security.

3. Notification Server & JSReport Server (Enterprise Microservices)

Mission-critical backend microservices handling high-throughput event notifications and dynamic PDF/Excel report generation.

- **Microservice Architecture:** Designed and maintained scalable Node.js microservices for event processing and dynamic reporting engine integrations.
- **API Standardization:** Authored comprehensive Swagger/OpenAPI documentation, streamlining frontend-backend integration and third-party developer onboarding.

4. Configurator Tool (JSON-Driven Enterprise Dashboard Platform)

Extensible dashboard configuration engine enabling customers to dynamically build enterprise views without code changes.

- **Core Architecture:** Key architect and developer for the JSON-driven rendering engine and customizable UI modules.
- **Customer Enablement:** Served as primary technical owner, working directly with enterprise clients to configure custom workflows and resolve complex production issues.

5. Technical Ownership & Customer Success Leadership

- **Engineering Mentoring:** Led Knowledge Transfer (KT) sessions and technical onboarding for new engineering hires, reducing ramp-up time by 40%.
- **SME & Production Support:** Functioned as Subject Matter Expert (SME) for enterprise microservices, performing root-cause analysis on production incidents and driving system reliability.

Fullstack Developer (Lead UI / Fullstack Role) | Cygnet Infotech Pvt. Ltd.

Jul 2019 – May 2021 | Ahmedabad, India

Key Stack: Node.js, React.js, Redux, Express.js, Jest, Enzyme, Storybook, REST APIs, HTML5/CSS3, Git

1. J2 Global (Enterprise Web Platform)

- **End-to-End Ownership:** Served as Lead Fullstack Developer, designing full-stack web applications using React.js, Node.js, and Express.js.
- **API & Component Integration:** Integrated robust RESTful APIs and built scalable component structures following strict coding standards and Agile practices.

2. Catalyst Console (Enterprise Administration Platform)

- **Frontend Leadership:** Led frontend development for a complex administrative console using React.js and Redux.
- **Testing & Design System:** Established testing standards by writing unit tests with Jest & Enzyme. Built an interactive visual component library using Storybook, significantly reducing visual regression bugs.

3. Genes2Teens.com (Healthcare & Wellness Platform)

- **Fullstack Implementation:** Architected responsive web pages in React.js paired with Node.js REST services, translating complex healthcare workflows into clean digital experiences.

UI Developer | Plumslice Labs Pvt. Ltd. (Digitalwave)

Jun 2018 – Jul 2019 | Ahmedabad, India

Key Stack: React, Redux, Angular 4, Node.js, Stylus, Pug/Jade, JavaScript, SCSS, HTML5/CSS3

1. FirstHandle (Marketing Automation Platform)

- **Ground-Up Development:** Built the core frontend web application from scratch using React and Redux, creating a modular architecture for high-performance marketing analytics.

2. WeeGreen Platform Suite (Campaign Management, Marketplace & Corporate Web)

- **Multi-Tenant Theming Engine:** Engineered a dynamic multi-tenant branding engine using Stylus, Pug, and Jade in Angular 4, enabling white-label customizations across client tenants.
- **Marketplace Capabilities:** Developed real-time e-commerce features including bulk catalog import/export, paginated listings, and live notification badges using modern JavaScript.

Frontend Developer | Asite Solutions India Pvt. Ltd.

Jul 2014 – Jun 2018 | Ahmedabad, India

Key Stack: JavaScript, jQuery, AngularJS, HTML5, CSS3, SASS, AJAX, WebSockets, Git

1. Adoddle (Enterprise Construction Collaboration Platform)

- **File Upload Engine Ownership:** Owned the complete File Upload module, engineering enterprise bulk file uploads, custom attribute metadata mapping, and chunked upload mechanisms for large files over unstable networks.
- **Project Structure Automation:** Developed automated folder & project cloning tools (Copy Folder Structure, Copy Project Structure) reducing manual administrative setup time.

2. Adoddle Workflows (Business Process Automation)

- **Real-Time Workflows:** Built interactive process automation interfaces using AngularJS, SASS, and WebSockets to deliver real-time data sync across multi-user enterprise approvals.

PERSONAL SAAS & KEY PROJECTS

Portfolio Builder Platform (Personal Full-Stack SaaS)

React | FastAPI (Python) | MongoDB | Vercel

- **End-to-End SDLC & Ownership:** Concepted, architected, and built a full-stack SaaS application enabling professionals to dynamically manage and publish custom portfolio websites without code.
- **Architecture & API:** Designed a robust FastAPI backend with Pydantic validation, structured REST APIs, and optimized MongoDB document storage for high-performance querying.
- **Frontend & Deployment:** Developed a responsive React management dashboard with instant live-preview sync and automated deployment on Vercel.

EDUCATION & ADDITIONAL INFORMATION

Master of Computer Application (MCA) 2014
Indus Institute of Computer Application, GTU (Grade: 60%)

Bachelor of Computer Application (BCA) 2011
R.J. Tibrewal Commerce College, Gujarat University (Grade: 61%)

Languages Known: English, Hindi, Gujarati
Key Expertise: Solution Architecture, Microservices, Security (VAPT/Snyk), Database Migrations, Frontend Systems, Customer Engineering
Address: 56, Sabandh Twins, Thaltej, Ahmedabad - 380054, Gujarat
